Final-year Software engineering student with a strong focus on Django web development. Proficient in building full-stack applications using Django, including user authentication, data management, and responsive design. Seeking an internship to enhance my Django skills by contributing to dynamic web projects and collaborating with experienced developers._

Projects

Alumni Management System

- Developed a project using Django, where alumni can register, update profiles, and track job switches and employment history.
- Integrated user authentication, including registration, login, and profile update features.
- Designed and implemented the admin dashboard for viewing alumni profiles and managing data.
- Utilized Django's built-in functionalities to handle data storage and security.

Task Manager Application

- Created a to-do list application with functionalities for adding, deleting, and marking tasks as complete.
- Utilized Django for backend development and Bootstrap for frontend styling.

Skills

- **Languages:** Python, HTML, CSS, JavaScript, C++. (with OOP concepts)
- **Frameworks:** Django, Bootstrap
- **Database:** SQLite, MySQL
- **Tools:** Git-Github, VS Code, Tablib (for data processing)
